

CFI COMMAND CENTER™

Centralized File Transfer Control for Government

Management, control, audit

A core component of CyberFusion Integration Suite (CFI)™, Proginet's universal solution for secure, fast file transfers, CFI Command Center™ provides a single point of control to manage all of your agency's file transfers, both inside and outside the organization, and across all major platforms (from Windows to the Mainframe).

Command Center serves as the digital dashboard into your organization's entire CFI network; using a standard Web browser, administrators can review and control all file-transfer activity – whether it be internal transfers within and across the agency, or external transfers with partners and other agencies at the federal, state, and local level.

Complete Audit and Compliance: Keep a Pulse on Your Organization's File Transfers

In a typical CFI network, file transfer activity is happening 24x7. Many times, it includes high volume file transfers, very large files, and users and systems spread across all fifty U.S. states, as well as other territories. Command Center gives your organization centralized access to logs of each and every transfer-related event at the local and central level, and produces detailed reports of every aspect of those transfers. Real-time alerts can notify your personnel instantaneously as circumstances warrant so that issues can be resolved quickly.

In addition to a standard set of detailed audit reports, delegated administration and an extensive set of online inquiry tools support ongoing operational and management needs. Having these tools centrally available at all times enables your organization to achieve total control of all file transfer activity, while maximizing efficiencies and helping ensure full compliance.

To learn more about Command Center, please visit us online at www.proginet.com or call +1 (516) 535-3600.

Specifications

Platforms

Unix (IBM AIX, HP-UX, SUN Solaris)
Windows (all Win32)
Linux
zLinux
VMware

Application Servers Supported

Apache Tomcat
IBM WebSphere
BEA Weblogic

Compliance

Detailed Auditing
Section 508 Compliant
Support for PCI-DSS, Sarbanes-Oxley, HIPAA, GLBA
Embedded Crystal Reports
Customizable Reports
Integration with Existing Reporting Tools

Security

FIPS 140-2 Compliant
X.509 Certificates Support
Public/Private Certificate Support
LDAP Authentication (including Active Directory)
Support for Web SSO Solutions
FFIEC Approved Two-Factor Authentication
Time of Day Access Controls
User, Group, or Department Administration
Centralized Data Repository Not Required
Built-In Authentication Repository
UserID/Password & Certificate Authentication
Proxy Accounts

Integration

Web Services Architecture
LDAP Support
API Support
SOAP Interface
Enterprise Application Integration
Rule-Based Processing of Data
Rule-Based Alerts

Encryption

SSL v.3 Support
Integrated PGP Support

About Proginet Corporation

Proginet Corporation offers universal, multi-platform software solutions for fast, secure, and inexpensive file transfers both inside and outside the enterprise. Hundreds of companies worldwide rely on Proginet's CyberFusion Integration Suite (CFI)® and Slingshot™ solutions to conduct business more efficiently while protecting customer data and limiting the risks associated with sharing proprietary information with partners and colleagues around the globe. With over 20 years of experience in the managed file transfer arena, Proginet's global customer base spans more than 30 countries and includes many Fortune 500 companies. Headquartered in New York, the company is publicly traded under the symbol [OTCBB: PRGF]. For more information, visit www.proginet.com.
