

CFI with RocketStream: Accelerate Your File Transfers...

Imagine increasing your CFI file transfer speeds up to 30 times faster. *Now you can!*

CyberFusion Integration Suite from Proginet is now enhanced with RocketStream file transfer acceleration technology and can deliver speeds up to 30 times faster than FTP and other commercial file transfer applications. CFI with RocketStream can be deployed at your organization to dramatically improve file transfer speeds across platforms as well as over the Internet.

Who will benefit most from CFI with RocketStream?

Companies deriving the full benefits of the solution will typically be transferring very large files using high-bandwidth connections with high network latency.

How do I know if it's right for me?

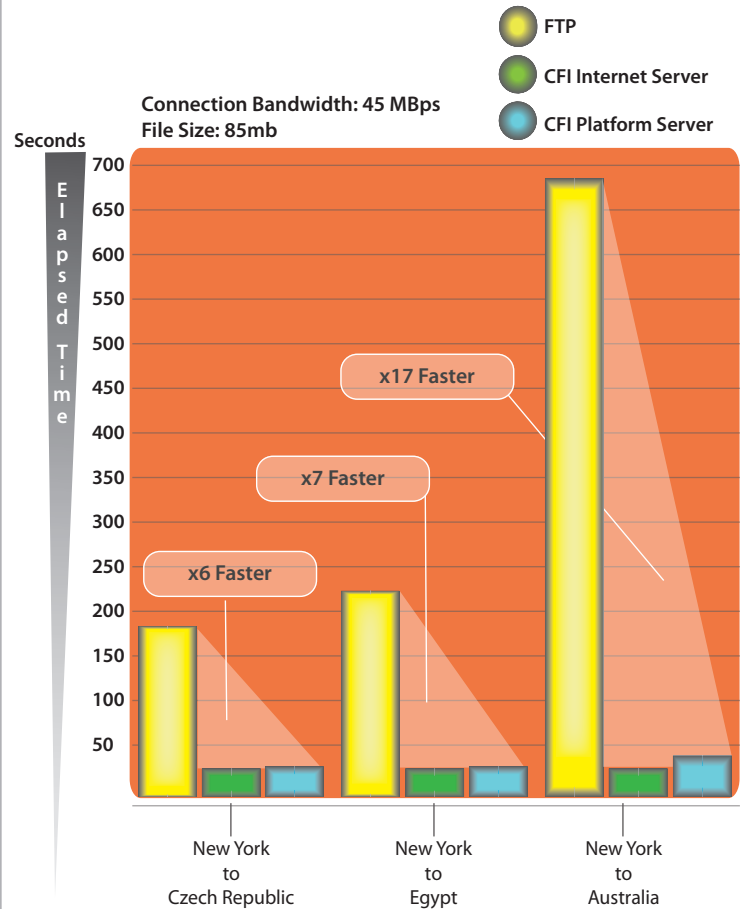

Transferring files between your data centers or with business partners in Asia, Europe, or North and South America? Maybe even using a satellite link? CFI with RocketStream excels at transferring very large files over long distances. What would it mean to your organization if you could deliver that huge daily file 5, 10, even 30 times faster?

CFI with RocketStream comes with all the great benefits you've already come to expect from CFI – it's just *much* faster!

High-level benefits:

- Improve transfer speeds over long distances
- Up to 30 times faster than FTP and standard commercial applications
- Adjustable throughput and Quality of Service

Speed Gains with CFI with RocketStream
